

Software Release Note MI Payload Version 2.05.00

Issue Date: March 22, 2012

Introduction

Release Status: Full Release (General Availability)
Previous Version: 2.04.01 (General Availability)

Target Release Media: CD ROM

Baseline Reference: MI Payload V2.04.01.01

Changes Implemented (*implemented in 2.05.00)

CR03896	Import update of transactions pending and complete
CR03897	Payload split into two different products
CR03907	Changes against the CR raised in MIPayload import-CR03896
CR03918	PV1 Vehicle type should not bound to take only 50000 of weight.
CR03914	MIP should work with out thousand seperator.
CR03924	Preference: Apply Tab level Security.
CR03916	Tickets do not display the Shift information. (if used)

Defects Addressed (*implemented in 2.05.00)

DR04819 Import: Immediate Import does not import data very first time DR04865 Import Utility: New fields are not included in Data Mapper for User Defiled Fields table DR04871 Import Utility: Vehicle Tare details are not being imported in case of Schedule Import DR04874 Import Utility: Does not import data in Commodity child table (Stock Adjustment) DR04881 Transaction Maintenance: Displays error message when user save the changed vehicle DR04612 Extract Utility: Message sequence is not correct DR04710 Transaction Maintenance: Displays Object Reference error DR04404 Security: Displays Admin user fields instead of new user fields DR04711 Transaction Maintenance: Displays exception and close the MIPayload, when user remove the source and press F5 DR04717 MIPayload and French: User can open multiple instance of some of components DR04398 Extract Utility: Exported XML file fields and data need some modifications DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04560 Financial Forms: Data Time format is not picked from system date time format DR04561 Export/Import does not use System Date Time format DR04666 Weighing: Indiactor dropdown displays blank DR04687 Creating UDFs with String type and providing data in Date format converts data in date format DR04888 WiWO shows same date time for both the weights in Weighmaster tickets (if weights are same) DR04886 Destination name is being printed wrongly on the Draft printing		
DR04871 Import Utility: Vehicle Tare details are not being imported in case of Schedule Import DR04874 Import Utility: Does not import data in Commodity child table (Stock Adjustment) DR04881 Transaction Maintenance: Displays error message when user save the changed vehicle DR04612 Extract Utility: Message sequence is not correct DR04710 Transaction Maintenance: Displays Object Reference error DR04404 Security: Displays Admin user fields instead of new user fields DR04711 Transaction Maintenance: Displays exception and close the MIPayload, when user remove the source and press F5 DR04717 MIPayload and French: User can open multiple instance of some of components DR04398 Extract Utility: Exported XML file fields and data need some modifications DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04680 Weighing: Indiactor dropdown displays blank DR04881 Creating UDFs with String type and providing data in Date format converts data in date format. DR04882 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04819	Import: Immediate Import does not import data very first time
DR04874 Import Utility: Does not import data in Commodity child table (Stock Adjustment) DR04881 Transaction Maintenance: Displays error message when user save the changed vehicle DR04612 Extract Utility: Message sequence is not correct DR04710 Transaction Maintenance: Displays Object Reference error DR04404 Security: Displays Admin user fields instead of new user fields DR04711 Transaction Maintenance: Displays exception and close the MIPayload, when user remove the source and press F5 DR04717 MIPayload and French: User can open multiple instance of some of components DR04398 Extract Utility: Exported XML file fields and data need some modifications DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04680 Weighing: Indiactor dropdown displays blank DR04881 Creating UDFs with String type and providing data in Date format converts data in date format. DR04883 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04865	Import Utility: New fields are not included in Data Mapper for User Defiled Fields table
DR04881 Transaction Maintenance: Displays error message when user save the changed vehicle DR04612 Extract Utility: Message sequence is not correct DR04710 Transaction Maintenance: Displays Object Reference error DR04404 Security: Displays Admin user fields instead of new user fields DR04711 Transaction Maintenance: Displays exception and close the MIPayload, when user remove the source and press F5 DR04717 MIPayload and French: User can open multiple instance of some of components DR04398 Extract Utility: Exported XML file fields and data need some modifications DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04680 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04871	Import Utility: Vehicle Tare details are not being imported in case of Schedule Import
DR04612 Extract Utility: Message sequence is not correct DR04710 Transaction Maintenance: Displays Object Reference error DR04404 Security: Displays Admin user fields instead of new user fields DR04711 Transaction Maintenance: Displays exception and close the MIPayload, when user remove the source and press F5 DR04717 MIPayload and French: User can open multiple instance of some of components DR04398 Extract Utility: Exported XML file fields and data need some modifications DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04650 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04874	Import Utility: Does not import data in Commodity child table (Stock Adjustment)
DR04404 Security: Displays Admin user fields instead of new user fields DR04711 Transaction Maintenance: Displays exception and close the MIPayload, when user remove the source and press F5 DR04717 MIPayload and French: User can open multiple instance of some of components DR04398 Extract Utility: Exported XML file fields and data need some modifications DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04881	Transaction Maintenance: Displays error message when user save the changed vehicle
DR04404 Security: Displays Admin user fields instead of new user fields DR04711 Transaction Maintenance: Displays exception and close the MIPayload, when user remove the source and press F5 DR04717 MIPayload and French: User can open multiple instance of some of components DR04398 Extract Utility: Exported XML file fields and data need some modifications DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04612	Extract Utility: Message sequence is not correct
DR04711 Transaction Maintenance: Displays exception and close the MIPayload, when user remove the source and press F5 DR04717 MIPayload and French: User can open multiple instance of some of components DR04398 Extract Utility: Exported XML file fields and data need some modifications DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04710	Transaction Maintenance: Displays Object Reference error
the source and press F5 DR04717 MIPayload and French: User can open multiple instance of some of components DR04398 Extract Utility: Exported XML file fields and data need some modifications DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04404	Security: Displays Admin user fields instead of new user fields
DR04717 MIPayload and French: User can open multiple instance of some of components DR04398 Extract Utility: Exported XML file fields and data need some modifications DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04711	Transaction Maintenance: Displays exception and close the MIPayload, when user remove
DR04398 Extract Utility: Exported XML file fields and data need some modifications DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)		the source and press F5
DR04405 Data Base Script for Preferences on fresh system: Some of the field value require changes DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04717	MIPayload and French: User can open multiple instance of some of components
DR04484 Extract: Displays incorrect field name DR04337 Weighing: Quantity edit box remain enabled DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04398	Extract Utility: Exported XML file fields and data need some modifications
DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04405	Data Base Script for Preferences on fresh system: Some of the field value require changes
DR04465 Weighing: Message Conversion rate does not exist Please update commodity stock manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04484	Extract: Displays incorrect field name
manually not visible to user DR04485 Extract: Fixed Field value get cleared DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04337	Weighing: Quantity edit box remain enabled
DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04465	Weighing: Message Conversion rate does not exist Please update commodity stock
DR04563 Financial Forms: Data Time format is not picked from system date time format DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)		manually not visible to user
DR04566 Containers: Displays exception DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04485	Extract: Fixed Field value get cleared
DR04616 Export/Import does not use System Date Time format DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04563	Financial Forms: Data Time format is not picked from system date time format
DR04659 Extract: DateTime format is incorrect DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04566	Containers: Displays exception
DR04686 Weighing: Indiactor dropdown displays blank DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04616	Export/Import does not use System Date Time format
DR04887 Creating UDFs with String type and providing data in Date format converts data in date format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04659	Extract: DateTime format is incorrect
format. DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04686	Weighing: Indiactor dropdown displays blank
DR04888 WIWO shows same date time for both the weights in Weighmaster tickets (if weights are same)	DR04887	Creating UDFs with String type and providing data in Date format converts data in date
same)		format.
	DR04888	WIWO shows same date time for both the weights in Weighmaster tickets (if weights are
DR04886 Destination name is being printed wrongly on the Draft printing		same)
	DR04886	Destination name is being printed wrongly on the Draft printing

Upgrade Scripts

MI Payload installer will create / upgrade database.

International Support

Supplied in English, French and Spanish only.

Operating System

32-bit versions of Windows XP Professional with SP3; and WIN-7 (32-bit / 64-bit) (Home Premium, Professional and Ultimate).

MI Payload database can reside on servers running Windows Server 2003 and 2008.

Known Issues

- 1) French help can only be supported till ver 1.04.00.
- 2) Spanish language can only be supported till ver 1.08.00.
- 3) Client PC will not be able to run schedule backup through MIPayload if MIP database is running on win2003 or win2008 and the network configuration is not domain based.
- 4) Base MIPayload must be un-installed prior to upgrade it with core version. Data created through base will be shared with core application.
